

	<p>How to insert Shuffle into the waterproof headphones. IF USING IN WATER - ONLY USE A WATERPROOFED SHUFFLE. (Standard Shuffles are not waterproofed.)</p> <p><i>Turn Shuffle on before placing Shuffle onto input jack. Green light will show on shuffle.</i></p> <p>Pinch open Shuffle clip and slide onto headphone backbone and jack.</p>	
	<p>To ensure the best sound quality and the security of the Shuffle please make sure the Shuffle is fully snapped into place on the jack. IF USING IN SALT WATER ALWAYS RINSE OFF HEADPHONE AND EARBUDS WITH CLEAN WATER. REPEATED USE IN SALT WATER CAN EVENTUALLY CAUSE PROBLEMS WITH THE EDDY.</p> <p>Turn into wired headphones by using the enclosed speaker wire with mic. The microphone is not waterproof.</p>	
	<p>Loop should go up, over and around the top of the ear. If using with goggles use goggle band to secure headphones. The Eddy will stay in place during flip turns.</p>	
	<p>You may get the perfect fit out of the box but you can adjust your headphones to fit you specifically. The Eddy is formed to fit a small head out of the box so make sure to stretch the Eddy out to fit your head. The Eddy should not fit so tight it pulls the earbuds from your ears.</p> <p><i>To make headphones fit tighter, gently pinch loop – but do not make the bend a V to prevent damage to the backbone wire.</i></p>	
	<p>If you find the earbuds pop out, gently bend the section just above the earbud in a slight crescent shape.</p> <p>Comfortable enough to wear all day long.</p> <p>Wear under a helmet, with a hat, with glasses or with goggles</p> <p>We hope you enjoy your headphones as much as we do!</p> <p>Please go to www.arriva.com and watch the Eddy custom fitting video for a great fit.</p>	
	<p>Arriva Incorporated P O Box 2814 Telluride, CO 81435</p> <p>www.arriva.com info@arriva.com</p> <p>Any questions please contact us.</p>	<p>If you need to return your headphones, please mail them to the address to the left with some order info and instructions to us and REFUND written on the outside of the package.
