

	<p>How to insert Shuffle into the headphones, with interchangeable earbuds. Sweat and water resistant, not waterproof.</p> <p><i>Turn Shuffle on before placing Shuffle onto input jack. Green light will show on shuffle.</i></p> <p>Pinch open Shuffle clip and slide onto headphone backbone and jack.</p> <p>Foam ear tips included for super fit.</p>
	<p>To ensure the best sound quality and the security of the Shuffle please make sure the Shuffle is fully snapped into place on the jack. Loop should go over and around the top of the ear.</p> <p><i>Sweat can still be an issue, make sure your fingers are dry before touching the controls on the Shuffle.</i></p> <p>Turn into wired headphones by using the enclosed speaker wire with mic. The microphone is not waterproof.</p>
	<p>You may get the perfect fit out of the box but you can adjust your headphones to fit you specifically. The Eddy is formed to fit a small head out of the box so make sure to stretch the Eddy out to fit your head. The Eddy should not fit so tight it pulls the earbuds from your ears.</p> <p><i>To make headphones fit tighter, gently pinch loop – but do not make the bend a V to prevent damage to the backbone wire.</i></p>
	<p>If you find the earbuds pop out, gently bend the section just above the earbud in a slight crescent shape.</p> <p>Comfortable enough to wear all day long.</p> <p>Wear under a helmet, with a hat, with glasses or with goggles</p> <p>We hope you enjoy your headphones as much as we do!</p> <p><b>Please go to <a href="http://www.arriva.com">www.arriva.com</a> and watch the Eddy custom fitting video for a great fit.</b></p>
